Welcome to your Summative Assessment!

This document deals with the summative assessment of your competence towards the outcomes which you need to achieve. "Summative Assessment is assessment for making a judgement about achievement. This is carried out when a learner is ready to be assessed at the end of a programme of learning" (SAQA: Criteria and Guidelines for Assessment Policy Document.).

ASSESSMENT APPEAL APPLICATION FORM

LEARNER'S NOTICE OF ASSESSMENT APPEAL

TO: **The Internal Moderator**

A meeting with the internal moderator is hereby requested to discuss the outcome of my assessment.

Internal moderator name _____

Date of submission: _____

Name of employee assessed: _____

Name of Assessor: _____

Date of feedback session: _____

Grounds for Appeal

No	Tick the applicable ground(s) for appeal	Tick
1	The assessment did not follow the laid down procedure	☒
2	Not all evidence available was taken into account during the assessment	☒
3	The assessor was not a subject matter expert nor was a subject matter expert present during the assessment process	☒
4	The assessment was not according to the performance criteria and the range statement stipulated in the unit standard	☒
5	Not all the range items were available for the assessment	☒

Reasons for Appeal

No	Please give detailed reasons for the choice(s) above

INSTRUCTIONS:

The following sections will test your knowledge and you are required to answer all the questions.

All true and false items must be answered.

Once you have finished you may obtain feedback from your assessor on the accuracy of your answer.

Lin

Principle: used circuit diagram, work logically from supply to load; I isolate and lock out first per Saws 10-42-1

2 Voltage test: check check connection control voltage at transformer fuse contacts coils to find where it stops

3 Continuity test with power off test n/o and n/c contacts, push button, over loads for open circuit

4 AC issue: watch for ghost voltage on long runs causing chatter use low- Ω test checks cables for burns

5 DC issue polarity critical. check byback diode isolate batteries DC stays main is off

Fault finding techniques in DC

Voltage tracing - measure voltage along the circuit

2 Polarity check ensure correct and connectors polarity

3 Resistance and continuity testing used to find broken conductors

4 Current measurement check if current is flowing as expected no current means open circuit and excess current means short circuit
